DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to TNF-antagonists and a use for producing drugs for treating septic disorders where the serum level of interleukin-6 increases in a measurement period of at least thirty minutes.

Group II, claim(s) 7, drawn to a method of establishing whether a sepsis patient is to be treated with TNF-antagonists.

2. The inventions are distinct, each from the other because:
3. The inventions of Group I and Group II are drawn to different methods and compositions having different uses, which are mutually exclusive, one from the other. In the instant case, Group I is drawn to the use of TNF-antagonists, including antibodies, monoclonal antibodies and a commercial pack containing said antibodies for the treatment of sepsis disorders. The method of Group II is entirely different from the treatment composition and method of treatment of Group I because it consists of method steps to establish whether a sepsis patient is to be treated with TNF-antagonists. Furthermore, Group I is not so linked to Group II as to form a single inventive concept. Therefore, a lack of unity is held between Group I and Group II since they do not share a common technical feature. In addition, Group I requires

Art Unit: 1646

considerations and searches which are different, non-cohesive, and cannot be used interchangeably with those required for Group II.

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Group, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
